

Unzip file phoenixpacket....rar

Install the program phoenixUSBPro.msi

After installation use the AW_LCTOOLS.key file to activate the software

Then mount the image *.IMG file from the folder and click start

Leave your Tab on OFF state

Connect the USB cable to the Pc first

While holding the down volume - key you must connect the tab to the other end of the USB Cable and as you connect the tab start pressing the power button ON/OFF, keep on pressing till the software detects the Tab and start the update

(You can Press it 10 times than the software will detect the Tab)
